Forecast for Monday 30 Sep 2024

Weather: A mainly cloudy day with showers or spells of drizzly rain off and on during the morning. Drier for the remainder of the day with occasional showers possible. A few brighter intervals are possible by late afternoon.

Chance of cloud-free hill tops above 600m: 10% or less for most of the day, becoming 40% by the evening.

Low cloud and visibility: Extensive cloud on most hills across the National Park and very poor visibility above 300-400m through the morning, with cloud even shrouding some ground above 200m at first. A gradual improvement through the day with good visibility developing at valley level and cloud bases lifting above 600-700m later.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Mist and fog will give poor visibility on the higher hills for most of the day, and after overnight rain there's likely to be saturated ground and standing water on paths making for very wet conditions first thing.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 29 Sep 2024	0.2mm	1mm	31.6mm

Forecast for Tuesday 01 Oct 2024

Weather: Fairly cloudy at first with the odd shower possible but thereafter a much brighter day with sunny spells and occasional cloudier periods.

Maximum wind: Northerly 20-25 mph.

Chance of cloud-free hill tops above 600m: 70%.

Low cloud and visibility: Periods of cloud above 700m through the morning then mostly patches above 850m by the afternoon. Poor visibility in cloud but otherwise generally very good visibility with excellent air clarity allowing distant hills and landmarks to be clearly seen.

Temperature: **Valleys:** Plus 8 Celsius rising to plus 16 Celsius.
At 600m: Plus 8 Celsius rising to plus 11 Celsius.
Freezing level: Above the summits.
